- **Location:** Strathcona County
- **Ownership:** The Air Liquide Group - Publicly traded
- **Land Holdings (acres):** 11
- **Approx. employees and full time contractors (excluding construction workforce):** 28

Company Profile

Air Liquide Canada was founded in 1911 and has over 2,200 employees and serves over 80,000 customers in Canada's aeronautics, automobile, agri-food, chemical, defence, electronics, energy, metallurgy, metal fabrication, mining and healthcare industries from sites located in key industrial regions from coast to coast.

At the Scotford complex, oxygen and nitrogen gases are produced for local industry along with liquid oxygen, nitrogen and argon for broader distribution throughout Alberta and the U.S. A cogeneration plant produces electricity and steam for Shell Chemicals and Air Liquide's internal uses, while supplying any surplus power to the Alberta grid. A CO2 plant recovers and purifies by-product carbon dioxide from Shell's plant for enhanced recovery of oil and gas, and food-grade applications.

A partner for the long term, Air Liquide relies on employee commitment, customer trust and shareholder support to pursue its vision of sustainable, competitive growth. The diversity of Air Liquide's teams, businesses, markets and geographic presence provides a solid and sustainable base for its development and strengthens its ability to push back its own limits, conquer new territories and build its future.

Products

- Oxygen, Nitrogen, Argon, Carbon Dioxide, Electricity, Steam

Infrastructure

- Road Access: Access from RR 214 (Located in Scotford)
- Rail Access: CN
- Pipeline Access:
- Power Provider:

Code: AL

Date: 2014-04
