General Information

- **Project Status:** Operational
- **Project Type:** Natural gas liquids and diluent fractionation and underground storage facility
- **Industrial Area:** Alberta's Industrial Heartland
- **Location:** Fort Saskatchewan
- **Ownership:** Keyera Facilities Income Fund - publicly traded
- **Land Holdings (acres):** 300
- **Approx. employees and full time contractors (excluding construction workforce):** 19

Company Profile

Keyera's Fort Saskatchewan facilities include a natural gas liquids (NGL) processing plant, storage facilities and four pipelines connecting to Keyera's Edmonton Terminal.

The Fort Saskatchewan Fractionation and Storage Facility receive natural gas liquids from connected pipeline systems and truck off-loading. These streams are fractionated into propane, butane and pentane plus products. Following fractionation the products are shipped to customers through pipeline systems or truck loading facilities. Products that are not immediately delivered to customers are stored in deep underground storage caverns for subsequent delivery to markets.

Products

- Propane, Butane, Condensate Products

Infrastructure

- **Road Access:** located off Highway 15 via 119 Street
- **Rail Access:**
- **Pipeline Access:** Natural gas liquids and diluent
- **Power Provider:** Fortis
