Company Profile

Sherritt International Corporation is a diversified natural resource company that produces nickel, cobalt, fertilizers, oil, gas and electricity. It also licenses its proprietary technologies and provides metallurgical services to other mining and refining operations world-wide. A low-cost operator across all segments, Sherritt's success is built on utilizing its proven technologies, financial acumen and operational expertise. Sherritt's common shares trade on the Toronto Stock Exchange under the symbol "S."

Sherritt is a world leader in the production of nickel and cobalt from lateritic ore, with operations in Canada, Cuba and Madagascar. The Company also produces oil and gas from assets in Cuba, Spain and Pakistan, and is the largest independent power producer in Cuba.

Sherritt is committed to upholding the highest standards of environment, health and safety practices at all of its operations and making valuable contributions to local communities.
