Company Profile

Umicore Canada is part of Umicore's Energy Materials business group and produces micron and sub-micron sized spherical fine cobalt powder for use as a binder in cutting tools. Umicore Canada makes its powder through a proprietary hydrometallurgical process that provides unique processing advantages for the end customer and improved tool properties. The facility maintains ISO 9001 and 14001 registration and is recognized by Alberta Environment as EnviroChampions.

Products
